

Respite care is a short stay ranging from 5 nights to 1 month available to begin Monday-Thursday. Respites are pre-planned and take at least a few days to put in place.

Residents will receive the following services:

- 24-hour staff supervision and assistance with Activities of Daily Living including medication administration
 - Residents may not self-administer their medications. This includes prescriptions, vitamins, supplements, eye drops and anything over the counter.
 - Unit dosed medications will be obtained from Health Direct Pharmacy at an additional charge.
- Medical management by the Brethren Village Medical Director
- All meals with menu selection
- Housekeeping and laundry
- Recreational and therapeutic activities

Steps:

- Contact Admissions if there's a need or interest in respite care.
- Admissions coordinates a medical and financial review to evaluate respite eligibility.
- After the eligibility and room availability is confirmed, the resident's primary care physician completes admission paperwork, which includes information like diagnoses, allergies, and medication orders. A new office visit is required if the last appointment is more than 60 days prior to the admission date.
- Respite care is a private pay service. Residents are responsible for a daily rate based on room size, level of care and as needed nursing supplies. On or before the day of admission, the resident will meet with Admissions to sign admission documents, prepay for the stay by check, and provide insurance cards, Power of Attorney and Living Will.

Provided:

- Private, fully furnished room
- Bed linens and towels
